BANGOR

Best new variety available

- High yields
- Yellow root with 17-18% dry matter
- Most of the root above ground
- Smooth, clean roots
- Easily lifted on all soil types

Ratings

Cleanness of root

Root in ground

Grazing suitability

Lifting suitability

Bangor is an improvement on the illustrious/long-time-acknowledged varieties Kyros and Troya – resulting in a yield increase and uniform roots.

Bangor is easily lifted on all soil types, due to the regular shape of the root and its high position above the ground.

With a medium DM in the root it results in a very high yield of 105%
