Pre Germ[®]

Reinforced turf

PROPERTIES OF SMOOTH STALK MEADOW GRASS

- An ideal turf specie
- Strongly rhizomatous, binds turf together
- Forms a dense low growing sward
- Prefers to be sown in warm conditions; once established very tolerant of wet and cold
- Certain cultivars as wear tolerant as perennial ryegrass
- Strong spring re-growth, naturally repairing damaged turf
- Used in most high quality turf mixtures

Pre Germ®

Reinforced turf

BENEFITS OF PREGERM

- **Faster germination, faster establishment**
- **More uniform germination and emergence**
- **Lower minimum temperature for germination**
- **Less moisture needed for germination**
- **More SSMG = More rhizomes = Stronger more wear tolerant turf**
- **J9 Stadia and All Weather Sport include  Pre Germ® Limousine Reinforced turf**

This unique proven discovery guarantees results!!!
