

A rapidly growing short term crop highly attractive to pheasants, partridge and deer both as cover and feed.

The large amount of nectar produced attracts bees and other beneficial insects which in turn provide added interest for game birds.

**Feed Crop**

**Nectar Source**

It is a useful component to add to mixtures due to its bulkiness and its ability to continue to provide holding cover and feed after the first frosts when the crop has fallen.

Buckwheat thrives in sunny rather than shaded areas.

Seed Rate	Pack Size	S
50kg/ha	10 & 25kg	U

**Organic seed available in 25kg packs**
