

A versatile permanent mixture with extreme sward density

### The famous versatile long term mixture giving quality forage for many years

- A dual purpose mixture which has become synonymous with quality permanent grass
- Very persistent and winter hardy which contribute to its longevity
- Includes high levels of White Clover and Timothy
- Will produce plenty of early grass, even in harsher parts of the UK

Recommended sowing rate: 14-16 kg/acre 35-40 kg/Ha
