

A specialist mixture for very dry conditions using deep rooted grasses

A specialist mixture for sandy/light soils

- All species are very deep rooting
- Will produce a large bulk of forage, even in drought prone soil
- Excellent disease resistance particularly crown rust which can be a big problem in hot, dry conditions
- Suitable for cutting or grazing

Recommended sowing rate: 15 kg/acre 37 kg/Ha

Contains:

Ryegrass — **PL**
Festulolium

Tall fescue — **PL**
Festulolium
