

# **HEIDRUN**

Festuca rubra rubra

# Strong creeping red fescue

Fast establishing with excellent density

- Very fast establishment!
- Improved traffic tolerance
- Very high shoot density
- Above average salt tolerance

# Ratings

## Easy establishment

Red Fescue in mixtures is often suffering from a slower establishment rate than perennial ryegrass. HEIDRUN performs better and will also perform better in repair/overseeding mixtures.

#### Improved wear tolerance

Strong creeping red fescue has average wear tolerance, but through breeding improved performance is observed with HEIDRUN. Appreciated on playgrounds!

#### Very high shoot density

Red fescue is fine and dense - nevertheless we added a little more density. Few chances for any weed to find room...

## **Higher salt tolerace**

In our salt tolerance trials HEIDRUN has shown performance above the average for the species.
