**Dual Purpose**

KROMI is suitable for use on golf greens or in luxury lawns because of its dense growth pattern and tolerance to close mowing.

**Hard Winter Tolerant**

KROMI has been selected in Denmark thereby proving its very good winter hardiness, which is built in the variety.

**Also for dryer areas**

As winter hardiness is very often correlated with drought resistance, KROMI can also be recommended for more dry areas when used in mixtures for lawn purposes without irrigation.
