

A dual purpose rotational mixture with early spring growth for early bite for ewes and lambs.

Similar to HF 11 but containing early Perennial Ryegrass for early bite

- Specifically formulated for early spring growth
- Designed for early sheep grazing' prior to first cut silage
- Offers great flexibility to beef and sheep farms
- High inclusion of White Clover, the same as HF 11

Recommended sowing rate: 13-15 kg/acre 32-35 kg/Ha
