

Pre December use

**The forage rape element of this mixture ensures quick establishment and high protein yields, whilst the stubble turnips provide energy and stockholding capacity.**

The mixture is ideal for fattening stock and will provide grazing from July through to December.

Sow mid April - mid September

Seed Rate	Pack Size	Stocking
6 - 8.5kg/ha	10kg	U

Stock should be introduced gradually over a two week period and an area of grassland should be available for animals to return to; water and hay or straw should also be made available. Please contact your supplier for further guidance.
